

Consolidator Grant

The aim of this grant is to give the most prominent junior researchers the opportunity to consolidate their research, and to expand and broaden their research activities. The Swedish Research Council supports basic research of high quality in national competition.

Summary

Type of grant	Career Support funding Humanities and Social Sciences
Area	Medicine and Health Natural and Engineering Sciences
Focus area	Educational Sciences Undirected
Applicant	Single researcher who has been awarded a doctoral degree more than seven and up to twelve years ago
Participating researchers	Participating researchers may not be invited to join the application.
Grant period	Six years
Grant amount	2,000,000 SEK per year
Budgetary framework	40 million SEK per year for a period of six years (indicating that a total maximum of 20 grants may be awarded)
Call deadline	8 March 2016 (at 2:00 PM)
Publication of grant award decisions	No later than beginning of December 2016
Grant period start date	January 2017 at the earliest

Eligibility criteria for grant applications

You must fulfil the requirements set out below to be eligible to apply for the grant. We will carry out controls in order to ensure that applications that do not adhere to the eligibility criteria are rejected from further processing.

Applicant

The Consolidator Grant is open to individual researchers. You are the project leader and scientific supervisor of the project and your active participation in the project must at least equal 50 percent of a full-time employment. You must hold a Swedish doctoral degree or an equivalent foreign degree, which was awarded more than seven years and no more than twelve years ago.

The grant will be administered by a Swedish HEI, or another public organisation in Sweden that fulfils the Swedish Research Council's [requirements for administrating organisations](#). Please note that you will not be able to apply unless your organisation is an approved administrating organisation

If you are awarded funding, you must be employed by the administrating organisation when the grant period begins unless the Swedish Research Council, the administrating organisation or another employer (where

applicable) agree otherwise. The employment must at least equal 20 % of a full-time employment. You do not have to be employed by the administrating organisation when the application is submitted.

[Read more about the researcher recruitment guidelines in the European Charter for Researchers on the EU website](#) 

Career age

You may apply for a Consolidator Grant if your doctoral degree was awarded more than seven years and up to twelve years ago at the application deadline of this call. The date of issue will be considered to be the point in time when all the requirements (for example mandatory courses, the oral defence of the doctoral thesis and the approved doctoral thesis). You will not be able to finalize your application if your doctoral degree was awarded less than seven years and more than twelve years before the deadline.

You may however be eligible to apply on the basis of an older doctoral degree if you can present a reason for a time deduction that is recognized by the Swedish Research Council. The circumstances recognized as valid reasons by the Swedish Research Council include: parental leave, positions of trust in trade union organisations and student organisations, mandatory service in the total defence, illness (own illness or care for close family members), medical internships or medical fellowship (applies to clinically active professionals). The last two categories may involve periods of up to 24 months each. Please note that unemployment, annual leave or other employment do not constitute valid reasons in this regard.

Should you wish to evoke such deductible periods of time, you must specify the reason and extent thereof in the application (cf. instructions under Descriptive data below).

We carry out random sampling checks and may request that you provide us with certificates that enable us to verify the reasons for time deduction included in your application.

Number of applications and previous grants

The eligibility criteria below only apply for you as the applicant and project leader, not as participating researcher.

What grants may I apply for simultaneously?

You may only submit one application for this grant under this call for applications. Other restrictions in regard to grants that are eligible in parallel in the same year are presented in the table below.

[Table: Grants that can be applied for in parallel](#) 

Please note that if you are awarded a Consolidator Grant, you will not be eligible to apply for an undirected Research Project Grant from the Swedish Research Council for the overlapping grant period.

What eligibility criteria apply to holders of ongoing research grants from the Swedish Research Council?

There are certain restrictions if you are the project leader of an already awarded and ongoing grant, with a grant period (disbursement period from the Swedish Research Council) overlapping the grant period of the current grant application. Please observe that the period of availability, i.e. the period during which you may draw on the awarded grant, generally is longer than the grant period. You will find information on the rules that apply to your ongoing grant in the “Approval of terms” that you received from the Swedish Research Council. If you are awarded a Consolidator Grant and hold an already awarded ongoing undirected Research Project Grant, the corresponding annual amount will be deducted from the fixed amount of two million SEK during the overlapping grant period. See the table below for further information on grants that are eligible for holders of ongoing grants.

Table: Grants eligible for applicants with ongoing grants 

N.B.: If you have been project leader for grants from the Swedish Research Council before, you will only be able to apply for a new grant if the final financial report on all previous grants were submitted within the stipulated time period.

For questions as to whether all financial statements have been submitted, please turn to your administrating organisation.

Participating researchers

You may not include any participating researchers in this application. Other collaboration partners (where applicable) and their roles shall be presented in the research plan (see instructions under Research plan below).

Costs and grant funding

The grant consists of a flat rate amount of 2,000,000 SEK per year, including indirect costs. The applied grant may be used to cover all kinds of project-related costs, but may however not be used to finance your own salary or scholarships. Researchers in the Humanities and Social Sciences and Educational Science are excerpts from this condition, and may use the grant to finance up to 50 percent of their salary.

The Swedish Research Council expects the administrating organisation, in its capacity of responsible employer, to cover any cost exceeding the awarded amount.

Grant period

The grant is awarded for a period of six years, starting from January 2017. Three years after the start of the grant period, the project leader must submit a mandatory report in the form of a presentation to the Swedish Research Council. The presentation should focus on the scientific progress that the grant has made possible as well as the development of the researcher’s activity. The report may result in revised grant amounts for the remaining grant period.

How do I apply?

You apply electronically through [Prisma](#), which is the application system used by the Swedish Research Council. You create an application in the Prisma system by filling out the text fields, retrieving information from your personal account, and by enclosing the required appendices.

In order for you to be able to apply, your organisation must have become an [approved administrating organisation](#) and created an organisation account in Prisma.

Most of the required steps in the Prisma system are described in the [User Manual](#) and the [FAQ answers](#). We advise you to have a look at these documents when you write your application.

Creating a personal account in Prisma

Before you can apply, you must create a personal account in [Prisma](#), where you will store your personal data and your cv. The information only has to be entered once, and may subsequently be supplemented or amended whenever necessary. The account will also enable you to register your publications for future use. Please note that publications stored in your account can't be transferred to the application form. This is due to the fact that the publications function is still under development and has not yet been implemented in the calls. The publications list must therefore be presented in the form of an attached pdf file (see instructions under Publications below).

Please remember to create your personal account well in advance. The applications that you register in Prisma will be linked to your personal account.

All other participants, who will be involved in the preparation of the application must also create an individual Prisma account, and agree to their participation.

Text

Some text fields are formattable, which means that in those fields you can change the font and size and insert certain tables, formulas and symbols. If you have written the text in advance using Microsoft Word, you will also be able to copy paste the text and keep the initial formatting. Pictures can however not be inserted into the text fields.

All text fields have limitations as to the number of characters and this will be illustrated by means of a character counter. If you use too many characters you will not be able to register the application.

Signing

You, as applicant must sign the project outline electronically in the Prisma system. Project outlines are not signed by the administrating organisation, only by the applicant. More information can be found under the tab Registering the project outline below.

What must the application contain?

We ask you to familiarize yourself with the application form in Prisma at the same time as you read through the instructions below.

Language

The scientific assessment of the applications is done by foreign peer reviewers. To guarantee a well-functioning procedure and a level playing field in the review process, we therefore ask you to submit your application in English.

Application subsections

The application form contains the following tabs:

- Descriptive data
- Research summary
- Budget and research resources
- Publications (pdf)
- Letter of support
- Administrating organisation
- Review panels
- Participants
- CV

Below you will find an outline of the information required under each tab. Mandatory information is marked with an asterisk* in the Prisma system.

Please note that there is a tab in Prisma for retrieval of publications from your personal Prisma account. This is however not used in the call and you may therefore disregard from it.

Descriptive data

Under this tab, you are requested to list the project title in Swedish and English, and to select keywords and SCB classification codes. In this section, you are also requested to fill in any deductible time period that you wish to evoke, and to provide an abstract and a popular science description (cf. instructions below).

Deductible time periods

Enter any longer interruptions during your time as an active researcher, which is due to a reason recognized by the Swedish Research Council. The research interruption period should be calculated and presented on a full-time basis and be rounded to full calendar months. For information on as to what qualifies as a valid reason, please see the heading Career age above.

Abstract

The research plan abstract should contain a short description of:

- **Purpose and aim:** The research activities to be undertaken and why.

- **Project description:** How the project will be implemented (the project organisation, the time table and the scientific methods to be used).
- **Significance:** The significance of the planned research for the research field.
- **Preliminary results:** Describe your own experiments and pre-studies, if these are present.

The abstract should include a brief outline of the aim and the implementation of the research activities. Please use a language that can also be understood by somebody with a different scientific background.

The outline may contain a maximum of 4,000 characters, including blank spaces (approximately one A4 page in Times New Roman, size 12, single spacing).

Popular scientific description

Describe the project in a way that makes it possible to understand for a person not familiar with the subject. Describe why and how the research will be conducted, and explain in what way the new knowledge might be important.

The popular scientific description is an important tool for us when we provide information about research financed by the Swedish Research Council. If your application is approved, we therefore reserve the right to use the description for information purposes.

N.B.: Unlike the rest of the application, the popular scientific description must be written in Swedish.

The description may contain a maximum of 4,500 characters, including blank spaces (approximately one and a half A4 page in Times New Roman, size 12, single spacing).

Research summary

Under this tab, you are requested to enclose your research plan in a PDF format and describe any ethical considerations.

Ethical considerations

Present the ethical issues raised by the research, and explain how they will be addressed in the research activities. We also ask you to indicate whether the research includes animal experiments, experiments involving human subjects, or the handling of personal data.

N.B.: As from 12 October 2015, anyone who uses genetic resources (genetic material of actual or potential value) and traditional knowledge pertaining to genetic resources, which were accessed after 12 October 2014, shall follow the EU ABS declaration and declare that the resource and the knowledge used have been obtained in line with the applicable legislation, and distribute any benefit deriving from the use thereof in a fair and reasonable way.

Exceptions apply to human genetic resources, material covered by the International Treaty on Plant Genetic Resources for Food and Agriculture, material included in the WHO's Pandemic Influenza Preparedness Framework and genetic material obtained from the Deep Seas.

For questions about the EU ABS declaration, please contact [the Swedish Environmental Protection Agency](#)⁷ (information in Swedish).

Research plan

In this section you are requested to attach your research plan in a PDF format. Please observe that the appendix may only contain one file, with a maximum size of 10 MB.

The research plan should consist of a short but complete description of the research task. The maximum length is ten A4 pages in Times New Roman, font size 12, single spacing, including references. The research plan should be given a forward-looking focus.

The following information must be included under separate headings in the research plan, and be listed in the given order:

- **Purpose and aims:** Present the overall purpose and specific objectives of the research project.
- **Survey of the field:** Outline previous research, either conducted by yourself or by others, as well as earlier research results in the field. Provide key references.
- **Project description:** Summarize the project by describing the theories, methods, time table and implementation. You should also outline the project organisation, and clarify your own and any other researchers' roles in the project.
- **Significance:** Describe the project's significance to the research field.
- **Preliminary results:** Describe your own experiments and pre-studies in the research area. If there are no preliminary results, this should also be stated.
- **International and national collaboration:** Describe your cooperation with Swedish/foreign researchers and research groups. Indicate whether you participate in, or refer to, international cooperation in your research.

Provide information on the following points under a separate heading if you consider them relevant to your application:

- **Equipment:** Describe the basic equipment that you, and the team, will have at your disposal for the project.
- **Need for infrastructure:** Specify the need for international and national infrastructure within the project. Also specify the need for local infrastructure if such equipment depreciation costs are included in the application. [Read more about research infrastructure supported by the Swedish Research Council](#)⁸.
- **Other grants:** If you intend to apply for several research grants, or if you have an ongoing grant awarded by the Swedish Research Council, you need to clarify how the projects relate to each other. You should also justify why you submit several applications.

Budget and research resources

Since the grant is awarded as a flat-rate amount, you do not have to provide a budget proposal in the application. The flat-rate amount will automatically appear in the application form and reflect the requested grant period.

Explanation of the proposed budget

Briefly describe the main costs you intend to cover under the framework of the grant. The outline may contain a maximum of 2,000 characters including blank spaces (equivalent to approximately half an A4 page in Times New Roman, font size 12, single line spacing).

Other funding

List any other project funding (either subject to an application or awarded) besides the funding requested under this call. Quote the rounded amounts in SEK.

Publications (PDF)

Under this tab, we ask you to attach your publication list in a PDF format. Please observe that the appendix may only contain one file, with a maximum size of 10 MB. If the attachment contains several files, you will therefore have to join them into a single file.

Include publications made in the last eight years and mark the five publications that are the most relevant to the project with an asterisk (*). Highlight your name in bold. Sort the publications under the following numbered headings in the given order:

1. **Peer-reviewed original articles**
2. **Peer-reviewed conference contributions** (the findings presented may not have been reported in other publications).
3. **Monographs**
4. **Research review articles**
5. **Books and book chapters**
6. **Patents:** Enter the patent registration date.
7. **Open access computer programs or databases that you have developed**
8. **Popular science publications including books/presentations**

N.B.: You shall only include articles (or equivalent) that have been published or accepted for publication. The application cannot be complemented with publications after the call has closed.

Letter of support

Here you attach a formal letter of support, from an authorised representative of the HEI where the research will be conducted, e.g., the head of the department or equivalent. The applicant's name and the name and function/position of the authorised representative must be made clear. The document must not exceed two A4 pages and must be presented as a single file in a PDF format.

The Letter of support must be written in English and contain the following information under the headings below:

Research profile

- A description of how the applicant's research is in line with the HEI's and institution's activities and future strategy
- A description of how the applicant is in line with the activities with focus on the research and teaching merits
- A description of the applicant's scientific independence

Employment

- Information about the applicant's type of employment as well as funding of the employment during the next ten-year period.

- A description of the HEI's career plan for the applicant during the next ten-year period.
- The administrating organisation will acknowledge its commitment by signing the application in the Prisma system.

Administrating organisation

Under this tab, you are requested to list the administrating organisation and the project site. The administrating organisation is the organisation that administers and accounts for the funds of the awarded project under the terms and conditions laid down. The project site is the organisational unit where the project will be based. The administrating organisation and the project site generally correspond to the HEI and the department where the project leader will be employed.

An application can only be linked to an administrating organisation with an approved Prisma account. Unless your administrating organisation already has such an account, you will have to ask it to [apply for an organisation account](#) with the Swedish Research Council.

Please contact your administrating organisation if your project site does not appear on the list. You have to provide the project site information to be able to finalize the registration of the application.

Review panels

Under this tab, you are requested to enter the review panel that you would want to scientifically assess your application. The final decision on the distribution of applications will be made by the Swedish Research Council.

[Review panels](#)

Participants

In this section, you may invite participating administrators to join the application. A participating administrator is a person, who does not take part in the project itself but can help you register and edit information in the application. Please note that you cannot include participating researchers in this application.

You may invite participating administrators, who do not yet hold a Prisma account. Each one of them must however open a personal Prisma account to be able to contribute to your application.

All participants must accept the invitation before you can finalize the application registration. Remember to make sure that you use the right email addresses when you send invitations to participants, and that each address is linked to invited person's Prisma account.

CV

Under this tab, you are requested to retrieve and enter relevant CV data stored in your personal Prisma account.

The following information must always (where available) be provided in your CV and limited to the number specified:

- **Education:** Graduate studies, specialist degree, as well as basic and advanced education.
- **Professional history:** Current employment (including information if it is a permanent position or not) and longer relevant positions you have held, postdoctoral visits and research exchanges that are relevant for the described research and any longer interruption in the research that has affected your ability to qualify as a researcher.
- **Merits and awards:** Fellowship, supervised persons (postdocs and postgraduate students; indicate the total number for each category and indicate up to 10 persons that are most relevant), up to 10 of your most relevant awarded competitive grants, up to 10 of your most relevant awards and distinctions, as well as up to 10 potential other merits of relevance to the application.
- **Intellectual property:** E.g., patents and freely available computer programs that you have developed, please indicate your up to 10 most relevant.

Registering the application

When you open the Registering the application tab, the system will perform a check to verify if any mandatory information is missing and inform you of any need for supplements. The application will not be registered unless you click the Register button.

Remember to use the preview function in order to double-check your application before submitting it!

N.B.: Please note that all invited participants must accept your invitation before you can proceed to register the application. Invitations that have not been accepted have to be removed.

The registered application can then be viewed in your personal Prisma account, under Applications and Applications and grants in the menu. If necessary, a registered application may be de-registered, edited and re-registered up to the call deadline.

You are responsible for ensuring that the application is complete, that is to say that the application form is filled out correctly, the required appendices are submitted, and that the requested information is provided in accordance with the instructions. We ask you to only submit specifically requested information. After the closing date, application addenda will only be accepted in cases where we have asked for supplements.

Signing the application

When you register the application, it will automatically be signed by you in your capacity of project leader. The application must also be signed by the official representative of the administrating organisation in order for it to be considered complete and be processed further in the review process. This representative is normally the head of the department where the research will be conducted, but that will depend on the organisational structure of your administrating organisation.

The signature *of the applicant* confirms that:

- The information contained in the application is correct and in line with the instructions from the Swedish Research Council.
- Any side-line occupation and/or commercial ties have been reported to the administrating organisation, and that no conflict with the principles of good research practice has been established.
- The necessary permits and approvals are in place at the start of the project, e.g. concerning the ethical review.

The signature *of the administrating organisation* confirms that:

- The organisation will accommodate the research and the equipment, and employ the applicant during the time period and to the extent presented in the application.
- The organisation approves the cost estimate presented in the application.
- The project will be conducted in accordance with Swedish law.

The parties must have discussed the above-mentioned points before the representative of the administrating organisation approves and signs the application.

N.B.: The official representative of the administrating organisation must have signed the application in Prisma within a week (seven calendar days) of the application deadline for it to be considered further in the review process.

What happens next?

When the call closes (at 2 PM on the final day for submission of applications), the registered application will automatically become final and given a registration number.

Your registered application will automatically be forwarded to the official representative of the administrating organisation, who shall sign the application within a week (seven calendar days) of the application deadline. You will receive an auto-generated email when the application has been signed.

You will find information about the status of the application, the registration number and the application signature under the tab Applications and grants in your account.

Scientific evaluation

The scientific assessment of the application will be made by active researchers. These peer reviewers evaluate each application (in competition with the other applications) on the basis of the assessment criteria established by the Swedish Research Council.

If an application does not comply with the instructions, this will be taken into account in the application review.

[How your application is evaluated](#)

[The Swedish Research Council's conflict of interest policy](#)

[The Swedish Research Council's gender equality strategy](#)

Decisions

Shortly after the grant funding decisions have been taken, information on the awarded grants will be published on the web page of the Swedish Research Council. After that, a notification of decision and a final statement for

your application can be found in your personal account under the tab Applications and grants. The final statement contains the application grading and, in some cases, written comments.

Contact

For questions relating to the application content

For questions relating to the application content, please email or call the contact persons listed below.

Erika Godoy, e-mail: erika.godoy@vr.se, telephone: +46 (0)8-546 44 029

Gergana Angelova Hamberg, e-mail: gergana.angelovahamberg@vr.se, telephone: +46 (0)8-546 44 146

Technical questions

We kindly ask you to first consult the help menu in the Prisma system, where you will find instructions and [FAQs](#) as well as a detailed [user manual](#), which describe most of the required steps in Prisma.

If you cannot find the answer to your technical question in the above-mentioned information material, please contact [our technical support team](#). Please note that depending on the workload, it may take up to 1-2 working days before you get a reply.
