

Research environment grant within Migration and Integration

The purpose of the research environment grant within Migration and Integration is to create added value from collaboration in larger groupings than in a normal project, and to create a long-term perspective. The applicant shall represent a constellation of several researchers from different higher education institutions (HEI) and/or different subjects, nationally or internationally, who are working towards a common research goal in the long term.

Collaboration may be justified by features such as a multi-disciplinary focused research task, collaboration between researchers at different universities, or research linked to a national/international infrastructure. The research task must be so extensive and so challenging that it cannot be addressed by a single project leader, and the application must demonstrate that the research environment offers a unique combination of the knowledge and competences required to address this particular task.

Within the framework for this call, the Swedish Research Council is preliminarily intending to fund five grants in total for research environments within migration and integration.

Summary

Type of grant	Research environment and research collaboration funding
Subject area	Humanities and Social Sciences Medicine and Health Natural and Engineering Sciences Educational Sciences Artistic Research Development Research
Applicant	Individual researcher
Participating researchers	A minimum of two and up to six researchers shall be invited to join the application.
Grant period	4-6 years
Grant amount	2-3 million SEK per year, including indirect costs
Budgetary framework	The Swedish Research Council is preliminarily intending to fund five grants in total within the framework for the call.
Call deadline	10 April 2018 (14.00/2 p.m.)
Publication of grant award decisions	No later than November 2018
Grant period start date	January 2019

Grant application requirements

The following criteria must be fulfilled in order for you to be eligible to apply for the grant. We carry out checks to ensure unqualified applications are rejected from further processing.

Focus

The Swedish Research Council has been tasked by the Government to establish a ten-year national research programme within migration and integration. According to the Government's assignment description, the programme "... shall illuminate all aspects of migration and integration, increase knowledge about the prerequisites for creating inclusive societies and cover research into both short-term and long-term causes and consequences of migration, such as economic, demographic and social aspects."

Based on the wording of the assignment (Ministry of Education and Science 2017a, Govt. Bill 2016/17:50, p. 86), the Swedish Research Council has identified the following subsidiary goals for the national programme (without any internal ranking): to contribute to high quality research and knowledge accumulation, contribute to evidence-based policy-making and administration, contribute to strong links between research and higher education, contribute to gender equality, ensure the research programme is well coordinated with other funding initiatives and that synergies are created, ensure the research programme is adapted and designed according to the prerequisites of the various research areas and is carried out in a flexible format, and that the research programme creates prerequisites for multi-disciplinary and multi-sector collaboration.

The Swedish Research Council is now issuing a call for proposals for research environments within the framework for the national research programme. According to the Government assignment, the grant shall contribute to long-term high-quality research and knowledge accumulation, and to cross-border collaboration. Applications within the call may focus on all aspects of migration, migrants and integration. In this context, migration refers to both voluntary and forced migration. It may include aspects such as migration due to family ties, labour migration, asylum-seekers, quota refugees and undocumented migrants. The Swedish Research Council welcomes applications within all scientific disciplines studying issues relating to migration, migrants and integration. As one of the ambitions of the programme is to increase the impact of research results in society, the application shall also state how you intend to disseminate the research results.

Applicant

The applicant must be an individual researcher. You will be the project leader and have scientific responsibility for the project, and your level of activity in the project must be no less than 20 per cent of a full-time equivalent. You must hold a Swedish doctoral degree or a corresponding foreign degree, awarded no later than the deadline for this call. The degree award date we use is the date you fulfilled all the criteria for a doctoral degree, such as mandatory courses, oral defence and an approved doctoral thesis. For applicants with Swedish doctoral degrees, the award date listed in Ladok applies.

Grants from the Swedish Research Council shall be administered by a Swedish university or HEI or another Swedish public organisation that fulfils our criteria for administrating organisations. To apply, your organisation must therefore be approved as an administrating organisation.

If you are awarded a grant, you must be employed by the administrating organisation at the start of the grant period, unless the Swedish Research Council approves an exception. The employment must equal at least 20 per cent of a full-time equivalent. You do not have to be employed by the administrating organisation at the time of applying.

Number of applications and previous grants

What grants may I apply for simultaneously from the Swedish Research Council?

Applications for Research environment grant and Research project grant:

You may apply for this grant at the same time as you apply for a research project grant. A prerequisite for both being granted is, however, that the research project grant application is not part of the application for the research environment grant. If the research project grant application is part of the application for the research environment grant and both applications are successful, the amount awarded for the research environment grant may be reduced.

Number of applications for a research environment grant:

You may only participate in one single application for a research environment grant under this call, as either applicant or participant. You may not apply for a research environment grant under any other of the Swedish Research Council's calls.

Other restrictions on the grants you may apply for during the same year are shown in the table below.

[Table: Grants you may apply for simultaneously](#)

What eligibility criteria apply if I already have a grant from the Swedish Research Council?

There are certain restrictions if you are the project leader of a previously awarded grant that is ongoing, that is to say where the grant period (payment period from the Swedish Research Council) overlaps the grant period of the grant this application covers. Please note that the availability period, that is to say the time during which you can draw down the grant awarded, is normally longer than the grant period. Information about the criteria for your previous grant can be found in the "Approval of conditions" you received from the Swedish Research Council.

If you have already been awarded a research project grant:

You may apply for a research environment grant if you are the project leader for an ongoing research project grant or career grant. However, for the application for a research environment grant to be granted, it is a prerequisite that the research project or career grant awarded is not part of the application for a research environment grant, but on the other hand, the research project or career grant awarded may complement the research environment grant.

If you have already been awarded a research environment grant:

You may not apply for this grant if you are the project leader for an ongoing research environment grant. You may apply for this grant if you are participating in an ongoing research environment grant, provided the content of the project is new and does not overlap with the previously awarded project. Likewise, if you are the project leader for an ongoing research environment grant, you may participate in a new application under this call. In both cases, when applying you must clearly state in the research plan how the new project differs from the old one.

If you have already been awarded a grant within the distinguished professor programme, or are a researcher recruited within the Swedish Research Council's call for international recruitment:

If you have a distinguished professor grant with a grant period that overlaps the grant period for this call, or are a researcher recruited through the Swedish Research Council's international recruitment call, you may not apply for a research environment grant within migration and integration. On the other hand, you may participate in an application for a research environment grant within migration and integration.

Please see the table below for further information on grants you may apply for if you have an ongoing grant.

[Table: Grants you may apply for if you have an ongoing grant](#)

Note: If you have been the project leader for previous grants from the Swedish Research Council that have ended, final financial reports for all of these must have been submitted within the permitted time frame in order for you to apply for a new grant. Please contact your administrating organisation if you are unsure whether all your final reports have been submitted.

What applies for applications to or grants from other funding bodies?

If your application to the Swedish Research Council relates to the same project idea as a grant you have already been awarded by, or are applying for to another funding body, please describe this.

Participating researchers

Your application must include a minimum of two and up to six participating researchers, that is to say researchers with a doctoral degree or corresponding competence, whose scientific competence will be crucial for the implementation of the proposed research. Participating researchers do not have to be employed by a Swedish HEI.

Participating researchers shall provide the necessary information themselves in Prisma, and upload these to the application. Any further participating partners and their roles shall be described in the research plan (please see instructions under "Research plan" below).

Costs and grant amounts

Grants may be applied for to finance all types of project-related costs, such as salaries (including your own salary, however no more than corresponding to your activity level in the project), premises, running costs (such as consumables, travel including stays at research facilities, publication costs and minor equipment), and depreciation costs. Grants may not be used for scholarships. If a doctoral student participates, project funds may not be paid out as salary for the period when the doctoral student is teaching.

Costs for a graduate school (that is to say costs for lecturers, courses and coordination of a graduate school) may be included in the grant.

The amount you may apply for is 2–3 million SEK per year, including indirect costs.

The Swedish Research Council assumes that the administrating organisation will cover any costs in excess of the amount received.

Grant period

You may apply for a grant to cover a minimum of four and a maximum of six years, starting from January 2019. The first payment will be made no earlier than December 2018.

The project leader shall submit a report no later than 1 March 2021, focusing on the collaboration between the participating researchers and the added value of the research environment. If the results do not correspond to the prerequisite that the award of the grant was based on, the grant amounts for the remaining grant period may be reviewed.

How do I apply?

You apply electronically in [Prisma](#), which is the application system used by the Swedish Research Council. You create your application in Prisma by filling in the text fields, uploading information from your personal account, and attaching the appendices requested.

To enable you to apply, your organisation must have been [approved as an administrating organisation](#) and have created an organisation account in Prisma.

For most items in Prisma, there is a [user manual](#) describing all the steps, as well as [answers to FAQ](#). Please refer to these when filling in your application.

Please avoid stating your own or anybody else's full personal identity number in the application except where specifically requested.

Creating a personal account in Prisma

Before you apply, you must create a personal account in [Prisma](#), where you can save your personal and CV data. The information only needs to be entered once, and can thereafter be supplemented or changed as required. As most of the Swedish Research Council's calls employ foreign reviewers, please use English when entering any descriptive text in you CV data. You can also input your publications for future use.

Please note that no publications can currently be uploaded from your account to the application form. This is because the publications function is under development and not yet used in the Swedish Research Council's calls. You should therefore submit your publications list as an attached PDF file instead (please see instructions under "Publications" below).

Please allow plenty of time to create your personal account. The applications you register in Prisma will be linked to your personal account.

All other persons participating in your application must also create a personal account in Prisma and confirm their participation. Thereafter they can add their data to the application via their personal accounts.

Text

Some text fields can be formatted, which means that the font, alignment and font size can be changed in these fields, and that tables and symbols can be inserted. If you insert text written using a word processing program (such as Microsoft Word), you may need to use the tools in Prisma to adjust the formatting after insertion. Images cannot be included in the text fields, however. We recommend that you use the fonts Arial, Calibri or Verdana.

All text fields have a limit on the number of characters, and this is illustrated by a character counter. If you use too many characters, the application cannot be registered.

Attached documents and appendices

You will need to attach an appendix to some fields as instructed. The appendix must consist of one file only, and you can only attach documents in PDF format. All appendices are limited as to file size and number of pages. You will not be able to register your application with an appendix that exceeds the stated maximum size.

Signing

Both you as applicant and an authorised representative of the administering organisation shall sign the application electronically in Prisma. Please see further information under "Registering the application" below.

What must the application contain?

Please refer to the application form in Prisma in parallel with reading the instructions below.

Language

Foreign experts are involved in the scientific evaluation of the applications. To ensure fair and equitable assessment and efficient processing, please therefore complete your application in English.

Sections of the application

The application form includes the following tabs:

- Descriptive data
- Research description
- Budget and research resources
- Publications
- Adminstrating organisation
- Participants
- CV

Descriptions of the information requested under each tab follow below. Mandatory information is marked with an asterisk (*) in Prisma.

Descriptive data

Under this tab, please fill in the Swedish and English project name, project period (number of years), and select SCB codes and key words. Please also fill in the abstract and popular science description as instructed below.

Abstract

The abstract shall include a brief description of:

- what is to be done: purpose and aim
- how the research will be carried out: project organisation, time plan and the scientific methods to be used
- what is important about the planned research

The abstract shall provide a summary guide to the purpose and implementation of the research. Please use wording to ensure persons with another subject specialisation can understand the information.

The description may cover a maximum of 1 500 characters including blank spaces (approximately one third of an A4 page in Arial, font size 11, single line spacing).

Popular science description

Describe the project in such a way that a person who is not familiar with the subject can understand it. Describe what is to be done and why, and explain in what way the new knowledge may be important.

The popular science description is an important tool when we inform about the research funded by the Swedish Research Council. If we grant your application, we reserve the right to use the description for information purposes.

Note: The popular science description must be written in Swedish, unlike the rest of the application.

The description may cover a maximum of 4 500 characters including blank spaces (approximately one A4 page in Arial, font size 11, single line spacing).

Research description

Under this tab, please describe any ethical considerations and attach your research plan and description of synergy effects and the added value of collaboration.

Ethical considerations

Describe the ethical issues raised by the research and how they are handled in the research work. Explain also why the research questions and expected results justify the conduct of the research, in view of the ethical issues raised. Please also state whether the research involves any handling of personal data, or experiments on animals or human subjects. If no ethical issues are raised, please state this.

Research plan

Please attach your research plan in PDF format. The research plan shall consist of a brief but complete description of the research task. The focus of the research plan shall be forward-looking, and it shall cover a maximum of ten page-numbered A4 pages in Arial, font size 11, single line spacing, including references and any images. **You will not be able to attach an appendix that exceeds the stated maximum number of pages or is larger than 10 MB.**

The research plan must include the following headings and information, listed in the following order:

- **Purpose and aims:** State the overall purpose and specific goals of the research environment. Describe also the long-term research goal.

- **State-of-the-art:** Summarise briefly the current research frontier within the field/area covered by the project. State key references.
- **Significance and scientific novelty:** Describe briefly how the project relates to previous research within the area, and its importance in the short and long term. Describe also how the project moves forward or innovates the current research frontier.
- **Preliminary and previous results:** Describe briefly your own previous research and pilot studies within the research area that make it probable that the project will be feasible. State also if no preliminary results exist.
- **Research description:** Describe the project design, including the following items:
 - Theory and method:* Describe the underlying theory and the methods to be applied in order to reach the project goal.
 - Time plan and implementation:* Describe summarily the time plan for the project during the grant period, and how the project will be implemented.
 - Project organisation:* Clarify the contributions by yourself and the participating researchers to the implementation of the project. Describe and explain the competences and roles of the participating researchers in the project, and also any other researchers or corresponding who are important for the implementation of the project.

Provide the following information also. If a heading is not relevant to your application, please leave it blank.

- **Equipment:** Describe the basic equipment you and your team have at your disposal for the project.
- **Need for infrastructure:** Specify the project's need for international and national infrastructure. Specify also the need for local infrastructure, if depreciation costs for this is included in the application. [Read more about research infrastructure supported by the Swedish Research Council.](#)
- **Other applications or grants:** If you are applying for or intend to apply for other grants from the Swedish Research Council, the relationship between the projects shall be clarified. This applies also if you are receiving ongoing grants from the Swedish Research Council with grant periods that wholly or partly overlap with the grant you are now applying for. You should also justify why you are submitting one or several further applications. Describe also the relationship with other applications to or grants from other funding bodies for the same project idea (from you or another researcher).

Synergy effects and added value of collaboration:

Attach a description of the synergy effects and added value of the proposed research environment in PDF format. The list may cover a maximum of three A4 pages in Arial, font size 11, single line spacing. **Please note that you will not be able to attach an appendix that exceeds the stated maximum number of pages or is larger than 3 MB.**

The following information must be included under separate headings, listed in the following order:

- **Synergy:** Describe how the proposed research environment makes it possible for the researcher constellation, jointly and in close collaboration, to undertake research tasks that are more comprehensive and challenging than would be possible if the researchers worked individually. State the central scientific questions for the research environment, how the environment will be built up and/or developed, and how it significantly improves the education, training and career opportunities for junior researchers, postdocs and doctoral students working in the environment. Describe how a graduate school, if you plan to include such, will be linked to the research environment. Describe how the environment will be integrated with the activities of the HEI/s, and how you intend to organise the work in order to achieve the goals of the research environment in as efficient a way as possible.
- **Collaboration:** Describe your own and the team's collaboration with foreign and Swedish researchers and research teams. State whether you contribute to or refer to international collaboration in your research.

Relevance

Describe how the research task is relevant for the areas of migration and/or integration (see the definition under the section "Focus"), and how it promotes the development of these areas. The description should include both information on how the research task contributes to moving the field of research forwards, and how it contributes to meeting important societal challenges within the areas of migration and/or integration.

The description may cover a maximum of 4 000 characters including blank spaces (approximately one A4 page in Arial, font size 11, single line spacing).

Budget and research resources

Under this tab, please list personnel costs, other costs and any other funding of the project.

Project staff

State the activity level/dedicated time (per cent of a full-time equivalent) of all personnel active within the project, that is to say yourself, other researchers and other personnel. Your activity level as project leader must correspond to no less than 20 per cent of a full-time equivalent.

Please also state the salary you are applying for, for yourself and/or other personnel active within the project, both as a percentage of a full-time salary and as actual annual amounts (including social security contributions). Please state rounded amounts in SEK.

Other costs

Describe any other costs of the project (premises costs, running costs including any costs for a graduate school and depreciation costs). Please state rounded annual amounts.

You may include depreciation costs for equipment to be used in the project, provided that:

- the equipment has an economic life of at least three years
- the equipment has an acquisition value exceeding a certain amount (please contact your administrating organisation for information about the amount that applies to your department)
- the equipment needs for your proposed project cannot be satisfied through use of national or international infrastructure open to all

[Read more about research infrastructure supported by the Swedish Research Council.](#) 

You may only include the proportion of depreciation costs that corresponds to the use of the equipment in the proposed project. You may not include depreciation costs for equipment that is wholly financed via other grants. Please contact your HEI for information about what is included in local research infrastructure, acquisition values or how to calculate depreciation costs.

Total project cost

Prisma will automatically add up your budget items listed in a table. The total amount you are applying for shall also include indirect costs. You will have to add these to the table yourself. Here you can also add any additional costs covered by the project (for which you are not seeking funding under this call).

Please contact your HEI for information on what constitutes indirect and direct costs.

Explanation of the proposed budget

Justify briefly each cost applied for in the budget stated. The description may cover a maximum of 4 000 characters including blank spaces (approximately one A4 page in Arial, font size 11, single line spacing).

Other funding

Please state any funding for the project (whole or part) received by you or another researcher, in excess of the amount requested in this application. Please state rounded amounts in SEK.

Publications

Under this tab, please attach your and the participating researchers' publications lists in PDF format to your respective fields.

Applicant's publications list

Please attach your publications list drawn up according to the headings and information below. The list shall cover a maximum of five page-numbered A4 pages in Arial, font size 11, single line spacing. **You will not be able to attach an appendix that exceeds the stated maximum number of pages.**

The list shall begin with the **maximum ten publications** of greatest importance for your application:

1. Selection of publications: List the maximum ten publications of greatest importance to your application. For each publication, please state how you contributed to it, and its relevance to the research project described (maximum four lines per publication). Highlight your name in bold in the author list.

You shall also list relevant publications **from the last eight years:**

2. Total number of publications: Sort the publications, with your name highlighted in bold in the author list, under each heading (publication type) in the following order:

- **Peer-reviewed original articles**
- **Peer-reviewed conference contributions**, the results of which are not included in other publications.
- **Peer-reviewed edited volumes**
- **Research review articles**
- **Peer-reviewed books and book chapters**
- **Other publications including popular science books/presentations**

Note: Please sort the publications under each heading in reverse chronological order, so that the latest publication is at the top of the list. Please only include articles or corresponding that are published or accepted for publication at the time of applying. The author order in the publications list shall be identical to that of the published work. The application cannot be supplemented with publications after the deadline for the call.

Participating researchers' publications lists

Attach all participating researchers' publications lists joined up into one file. **The list for each researcher shall include a maximum of ten publications**, in the form of the most relevant publications for the research described, and shall cover a maximum of one A4 page. The name of the researcher in question shall be highlighted in bold and also be included in the page header of each list.

Note: Please only include articles or corresponding that are published or accepted for publication at the time of applying. The author order in the publications list shall be identical to that of the published work. The application cannot be supplemented with publications after the deadline for the call.

Administrating organisation

Under this tab, please state the administrating organisation and project site. The administrating organisation is the organisation that administers the grant awarded and is responsible for it according to the conditions set. The project site is the organisational unit where the project is carried out. Normally, the administrating organisation and project site correspond to the HEI and the department where the project leader is employed.

To allow you to link your application to an administrating organisation, the organisation must have an approved account in Prisma. Please contact your administrating organisation and ask it to [apply for an organisation account](#) with the Swedish Research Council if it does not already have one.

If your project site is not listed in Prisma, please contact the person responsible for the organisation account at your administrating organisation. You will not be able to finalise the registration of your application if the project site is missing.

Participants

Under this tab, you as applicant may invite other participating researchers and participating administrators to your application. A participating administrator is a person who is not necessarily part of the project, but who can help you to input and edit information in the application.

When inviting participants, please make sure you use the correct email address linked to the person's Prisma account. You may invite participants who do not already have an account in Prisma, but in order to participate in your application they must register their own personal accounts in Prisma. All participants must accept their invitation, and participating researchers must upload their CV data to the application before you can finalise the registration of the application.

Once a participating researcher has accepted your invitation, you can allocate authority to him/her to edit the application.

CV

Under this tab, please upload your relevant CV information from your personal account in Prisma. Any participating researchers must upload their own CV information to the application. **As project leader, please state your leadership merits under "Other merits".**

The following information, where available, must always be included in each CV, taking into account the stated limitation in numbers:

- **Education:** First, second and third cycle higher education and specialist degrees.
- **Work:** Current employment (including whether permanent or not) and longer relevant employment, postdoctoral visits (also included as employment, if relevant), research exchanges relevant to the research described and any longer interruptions in the research that have impacted on your opportunity to gain merits as a researcher.
- **Merits and awards:** Docentship/associate professorship, supervisees (postdoctoral and doctoral students; state the overall number of each category and list the 10 most relevant to you), up to 10 of your most relevant grants awarded in competition, up to 10 of your most relevant prizes and awards, and up to 20 other merits (including leadership merits for the project leader) relevant to the application.
- **Intellectual property rights:** For example, patents and open access computer programs developed by you; state up to 10 of your most relevant.

Registering the application

The tab "Check and register" shows a summary of the fields in your application that may require action in order to register it (such as mandatory fields not filled in, text fields with too many characters, discrepancies from limits on the possible project period or budget applied for). The registration of your application is not finalised until you click on the "Register" button.

Please make sure you use the preview function before registering your application.

Note: Everybody you have invited in your application must accept the invitation before you can register the application. If an invitation is not accepted, it must be deleted. Before registration, all participating researchers must also upload their CV information from their own personal accounts in Prisma.

The registered application can thereafter be found in your personal Prisma account in the tab "Applications and grants", under the menu choice "Applications". Until the deadline for the call, a registered application may be de-registered, amended and re-registered again as necessary.

It is your responsibility to ensure the application is complete, that is to say the application form is correctly filled in, the correct appendices are attached and the information requested has been provided according to the instructions. Please only submit material specifically requested. We do not accept any additional information after the deadline, except when specifically requested.

Signing

When you register the application, it is signed by you as project leader. To ensure the application is deemed complete and included in the review process, an authorised representative of the administrating organisation also has to sign the application. The representative is normally the head of the department where the research will be carried out, but this is dependent on your administrating organisation's structure.

The *applicant's* signature confirms that:

- the information in the application is correct and complies with the Swedish Research Council's instructions
- secondary occupations and commercial ties have been reported to the administrating organisation and that nothing has emerged that breaches good research practice
- the applicant has not been found guilty of scientific misconduct during the last two years before the deadline of the call
- the permits and approvals required have been obtained before the research is started, such as permits from the Swedish Medical Products Agency or approval from an ethical review board or an ethical committee on animal experiments
- the applicant will comply with all other conditions applicable to the grant

The signature of the *administrating organisation* confirms that:

- the research or research-supporting activity described can be given room at the administrating organisation during the period and to the extent stated in the application
- the applicant will be employed by the administrating organisation during the period covered by the application
- the administrating organisation approves of the budget in the application
- the applicant has not been found guilty of scientific misconduct by the administrating organisation signing during the last two years before the deadline of the call
- the administrating organisation will comply with all other conditions applicable to the grant

The above points shall have been discussed by the parties before the representative of the administrating organisation approves and signs the application.

Note: The authorised representative of the administrating organisation must sign the application in Prisma no later than one week (seven calendar days) after the call deadline date in order for the application to be considered further in the review process.

What happens next?

When you have registered your application and the call closes (at 14.00/2 p.m. on the deadline date of the call), the registration of your application is automatically finalised and your application is given a registration number.

Your registered application is automatically forwarded to the representative of the administrating organisation for signature in Prisma. The application must be signed by the administrating organisation no

later than one week (seven calendar days) after the deadline. You will receive an email when the application has been signed.

Thereafter you will find information about the status of the application, registration number and signature of the application in your account in Prisma, under the tab "Applications and grants".

Evaluation

The scientific evaluation of the application is carried out by active researchers. These peer reviewers evaluate the application in competition with the other applications on the basis of the evaluation criteria set by the Swedish Research Council.

If an application is not completed according to the instructions, this will be weighed into the evaluation.

[Review panels](#)

[How your application is evaluated](#)

[The Swedish Research Council's conflict of interest policy](#)

[The Swedish Research Council's gender equality strategy](#)

Decision

Shortly after the grant decision has been made, a notice of the grant awards will be published on the Swedish Research Council's website. You will thereafter find a notice of the decision and a final statement on your application in your personal account in Prisma, under the tab "Applications and grants". The statement consists of a grading and, in some cases, written comments.

The EU ABS Regulation and due diligence declaration: As from 12 October 2015, users of genetic resources (genetic material of actual or potential value) and traditional knowledge relating to genetic resources, obtained after 12 October 2014, shall comply with the EU ABS Regulation (No 511/2014) by making a "due diligence declaration". This applies only to grant recipients. Due diligence entails the user being able to show that the genetic resource was obtained according to applicable legislation in the country in question and that the possible benefit of the genetic resource will be allocated in a reasonable and equitable way.

Exceptions apply to research into: the human genome, plant genetic material included in [Appendix 1](#) to the international agreement on plant genetic resources, pandemic influenza virus and genetic material obtained from international waters. If you have any questions about the regulations and due diligence, please contact [Naturvårdsverket](#).

Contact

If you have any questions about application content, please contact one of the following persons:

[Monica Svantesson](#), +46 (0)8- 546 44 024

[Caroline Olsson](#), +46 (0)8- 546 44 026

Technical questions

In the first instance, please consult the help menu in Prisma for instructions or [FAQ](#), including a detailed [user guide](#) that describes most items in Prisma.

If you cannot find the answer to your technical question, you may contact our [Technical Support](#). Please note that it may take one to two working days to get an answer, depending on the work load of the support personnel.
